

## Divine shield.

We see too much grief, pain and unnecessary deaths in Ukraine now. With this appeal, we hope that we will be able to convince and unite as many parties as possible to a common understanding of the need to end the conflict.

Our humanitarian organization has been trying to help children in orphanages in Ukraine for several weeks now, but as we state, it is not food, clothes, and medicines that children need now, but a sense of security!

The main idea is to create a zone of 500 meters around each orphanage without the presence of any type of weapon, ANY type of WEAPON. The safety of orphans is the most important and the main reason for our initiative.

Pope Francis and Metropolitan Kirill, Patriarch of the Orthodox Church, can become guarantors of respect for the treaty, hence the name of the project: the Divine Shield protecting the most innocent and defenseless in any armed conflict, in our case the Ukrainian conflict is no exception. In Ukraine, there are now more than 100 orphanages, which will need

guardian angels from among the volunteers of Catholic and Orthodox monks.

Active participants in the conflict, Russia and Ukraine, will be signatories of this agreement and will also be guarantors of the safety of orphans.

At the request of the parties, the dimensions of the Divine Shield can be increased to any size, which may allow ending this conflict in a third way: not military or diplomatic, but God!

We propose to increase the number of participants in this peace process, it is clear that the European Parliament, the UN and other international organizations should participate in it.

When the hour comes and each of us will stand before the Lord, we will have something to answer his question: Have you deserved my love? And each of you who will help save at least one orphan will be able to answer God with a pure heart: YES, because at the right time I extended a helping hand to those in need!!!
